

Moriroku Co., Ltd. Profile

Moriroku has been taking on challenges for 360 years.

When we supplied indigo to the world.

When we began handling synthetic resins.

When we became a manufacturer.

Today, too, as we seek to our 400th anniversary.

Over our long history we have learned to transform ourselves, and we will continue to create new value in the future and exceed customer expectations.

Moriroku is still taking on challenges.

[Principles]

Moriroku Group will create high value with its future-oriented creativity and advanced technologies, while contributing to the global society.

1.Compliance

We will comply with domestic and foreign laws and regulations, and aim to become a trusted industrial group through fair and equitable corporate activities.

2.Respect for life and dignity

Our corporate members will individually exercise their autonomy and creativity, and respect the personality and individuality of their colleagues.

3.Customer Satisfaction

We will provide our customers with valuable ideas, high quality services, and fine products to maintain their satisfaction.

4.Contribution to Society

As a good corporate citizen, we will contribute to society through environmental consciousness and community-oriented corporate activities.

5.Progressive Spirit

We will make continued efforts to improve our corporate value, by anticipating future trends.

6.Total Cooperation

We aim to become a corporate group that puts a premium on teamwork and the pursuit of ideals.

Built On The DNA Of Our Predecessors, Who Always Aim For “Challenge” Creating New Value That Will Serve As The Foundation Of The Future

Moriroku was founded in 1663 and is Japan's oldest chemical specialty group, with a history spanning over 360 years. We are proud to have built our reputation on the trust of our many customers and business partners, and we are committed to providing new value that anticipates the needs of society.

As a public company trusted and needed by society, we will further strengthen our management foundation, focus on co-creation management through constructive dialogue with our stakeholders, and transform ourselves into a Mori Roku Group suitable for the new era. We make sustainability the foundation of our management. We create an environment where diverse human resources can thrive and grow, and we contribute to the resolution of social issues and the sustainable development of local communities through our business by practicing ESG management.

Inheriting the "DNA of innovation" cultivated over our long history, We will continue to innovate to build the next future that will make us a 400-year company.

Naoki Kurose
Representative Director,
President and CEO

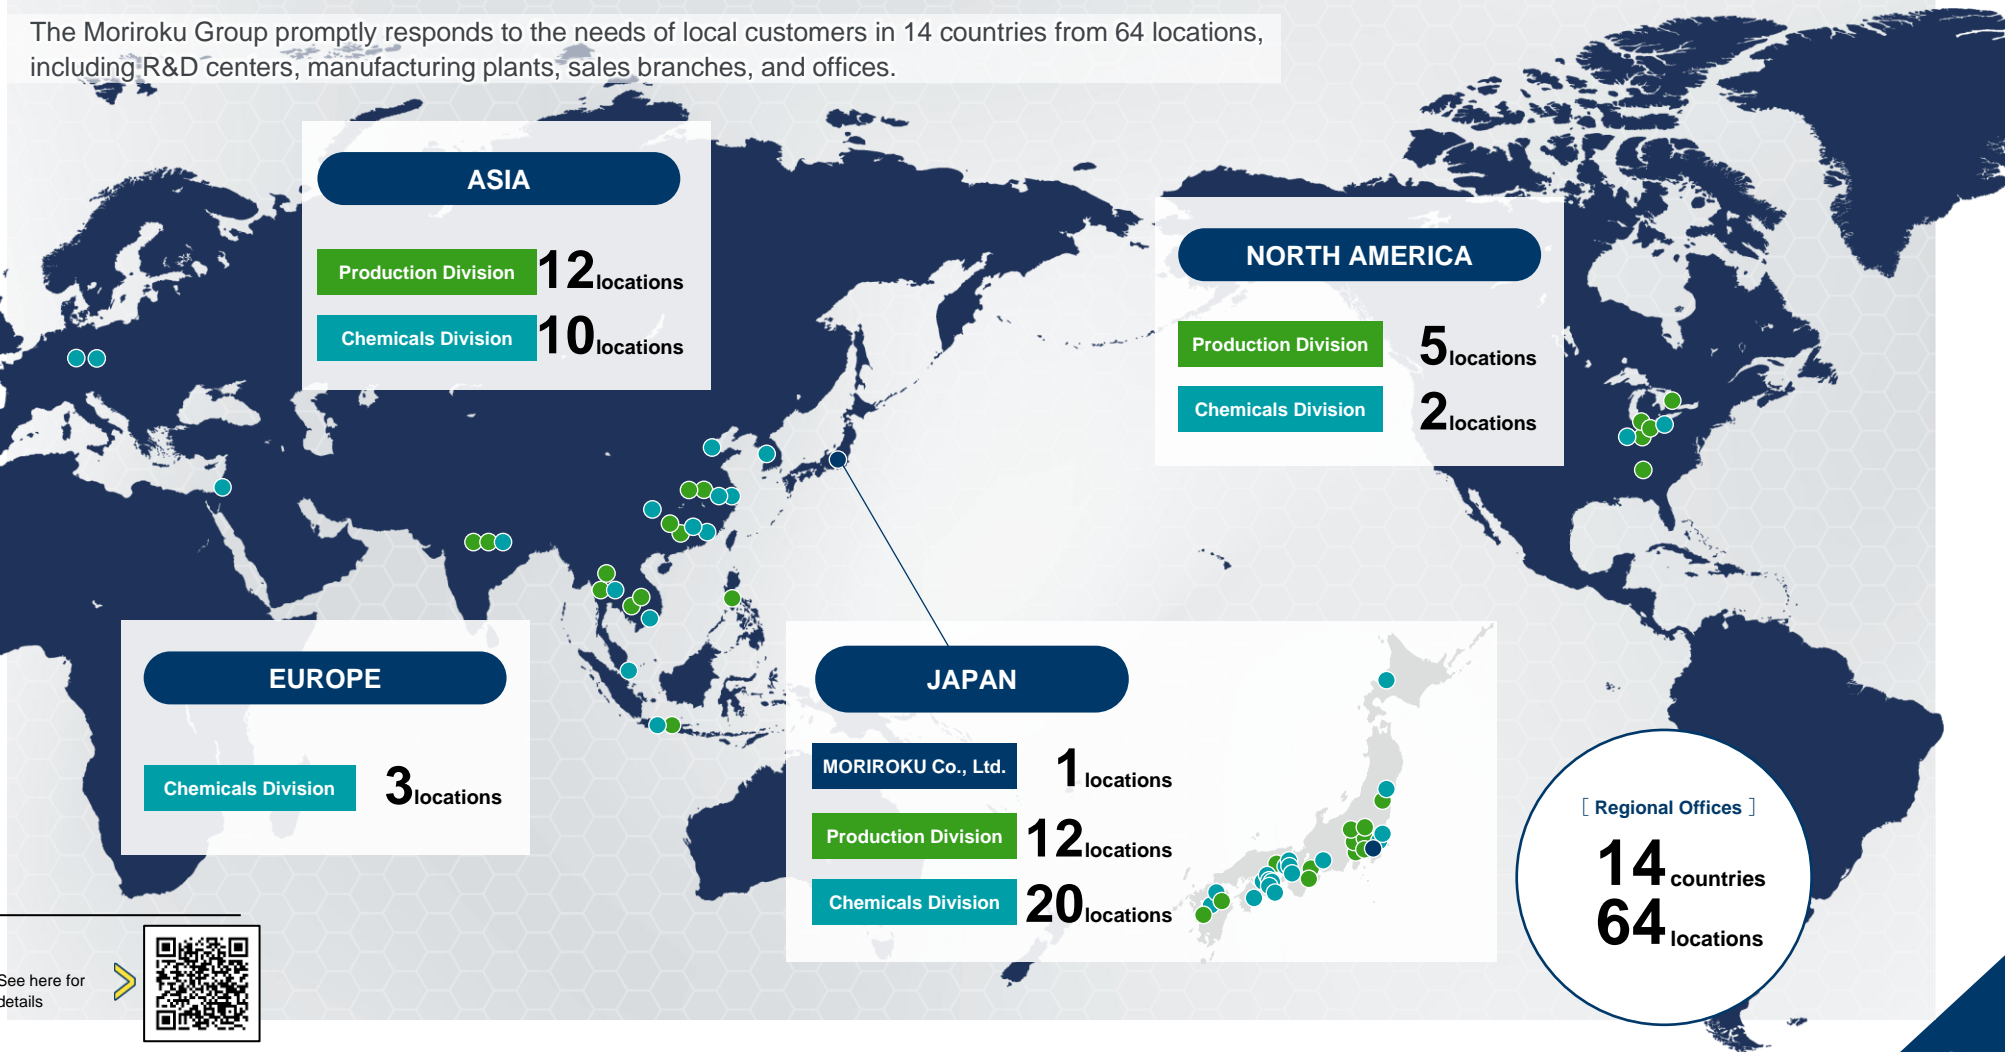

We bring together manufactures of resin molded products and chemicals trading companies that cover a broad range of business fields in order to offer high value-added solutions for customer’s needs.

Swiftly Responding to Customers' Needs Through Global Network

The Moriroku Group promptly responds to the needs of local customers in 14 countries from 64 locations, including R&D centers, manufacturing plants, sales branches, and offices.

See here for details

Adapt to the Changing Times and Always Challenging to Create New Value

The beginnings of the Moriroku Group can be traced back to the year 1663 in the former province of Awa in Tokushima Prefecture. Over the centuries, since our initial forays in trading indigo and fertilizer, we have kept up with changing times as chemical products became widespread and industries became globalized.

<p>— 1663 —</p> <h3>Foundation</h3> <p>The first Yasubei Mori, the founder of Moriroku, started trading indigo leaf balls and their fertilizers in Awa Province (Tokushima Prefecture).</p>  <p>A Moriroku newspaper ad from the late 1800s</p>	<p>— 1909 —</p> <h3>Entering the modern chemicals industry</h3> <p>Adapting to the changing times, we started handling synthetic dyes after importing Indian indigo and artificial indigo.</p>  <p>Moriroku's office in the earlier years</p>	<p>— 1958 —</p> <h3>Establishing manufacturing-sector business</h3> <p>Honda Motor Co., Ltd. used low-pressure polyethylene, Hi-Zex for its Super Cub motorbike, and our resin processing business was launched.</p>  <p>Completed Suzuka Plant (1965)</p>  <p>Kanto Plant begins operations (1980)</p>	<p>— 1986 —</p> <h3>Global expansion</h3> <p>We established our first overseas business and production center, Greenville Technology, Inc., in Ohio, U.S.A.</p>  <p>Greenville Technology, Inc.</p>	<p>— 2017 —</p> <h3>Listed on the first section of the Tokyo Stock Exchange</h3> <p>With the listing of our shares, we made a new start aimed at our 400th anniversary, looking to make an even greater contribution to all our stakeholders.</p>  <p>Listing on the first section of the Tokyo Stock Exchange</p>
---	---	--	---	--

Aiming for 400 years.

Contributing to The Future of Global Society

In the 360 years since its foundation, the Moriroku Group has continued to engage in business with the support of its many stakeholders. Under the Moriroku Group Sustainability Policy, we aim to become a "400-year company" that is increasingly expected and sought after by all stakeholders by engaging in business activities that take all stakeholders into consideration and by contributing to the resolution of social issues.

See here for details

Moriroku Group Stakeholders

[The Sustainability Policy of the Moriroku Group]

Based on our management principles, we, the Moriroku Group, and our stakeholders will co-create the value required by the new age and contribute to the sustainable growth of society.

- We will work to solve social issues beyond conventional business areas by leveraging the Group's functions and resources to the fullest.
- We will aim for a sustainable mobility society through innovative manufacturing that contributes to carbon neutrality and the cyclical use of resources.
- We will contribute to the achievement of an ecological, recycling-based society by providing green chemicals throughout the entire supply chain.
- Based on a foundation that respects human rights, we will continue to create new value through an organization that pursues employee wellbeing and in which diverse personnel participate actively and work with satisfaction.
- We will nurture mutual trust via highly transparent and honest business activities, understanding the expectations and requests of society through dialogue with stakeholders.

Respect each other's individuality through all corporate activities and contribute to the sustainable growth of society

Based on the "Human Rights Policy" formulated as the Morioku Group's basic stance in line with our Management Philosophy and Action Guidelines, we will conduct our business activities in consideration of human rights throughout our global supply chain to enhance the resilience of our management.

Succession of Resonac's Automotive Molding Components Business and Launch of the New Organizational Structure

On April 1, 2026, the Morioku Group succeeded Resonac's automotive molding components business, taking over two domestic sites and the Thailand operation. With new members bringing diverse experience and fresh perspectives, we are strengthening collaboration and leveraging our combined strengths to deliver greater value to stakeholders and pursue sustainable growth.

Supporting female pro golfer Akira Yamaji

With the idea of "growing together and taking on the world," the Moriroku Group has had a sponsorship agreement with golfer Akira Yamaji since September, 2019. We have a dedicated website that provides regular updates on Akira's latest achievements.

We hope you will join us in supporting her.

We are proud to welcome wheelchair tennis player Tomoya Tachi, who continues to excel internationally.

On April 1, 2025, the Moriroku Group signed an affiliation agreement with wheelchair tennis player Tomoya Tachi, welcoming him as a new employee. Aiming for the Los Angeles Paralympics, he embodies our vision of "leading with creativity and innovation," and we will support him company-wide. Through his achievements in Japan and abroad, he will inspire both our employees and society at large.

Meeting the Increasingly Complex Needs of the Mobility Industry Creating High-Quality Products with Diverse Technology

We offer a broad lineup, including plastic injection parts for automobiles, motorbike bodywork parts, and functional parts. The ideas we generate through proposal-oriented development based on market needs are subjected to prototyping and testing and turned into polished designs. These designs then become mass-produced products, manufactured in factories around the world to optimal quality standards.

See here for details on four-wheel and two-wheel vehicle parts

Four-Wheel Vehicle Exteriors

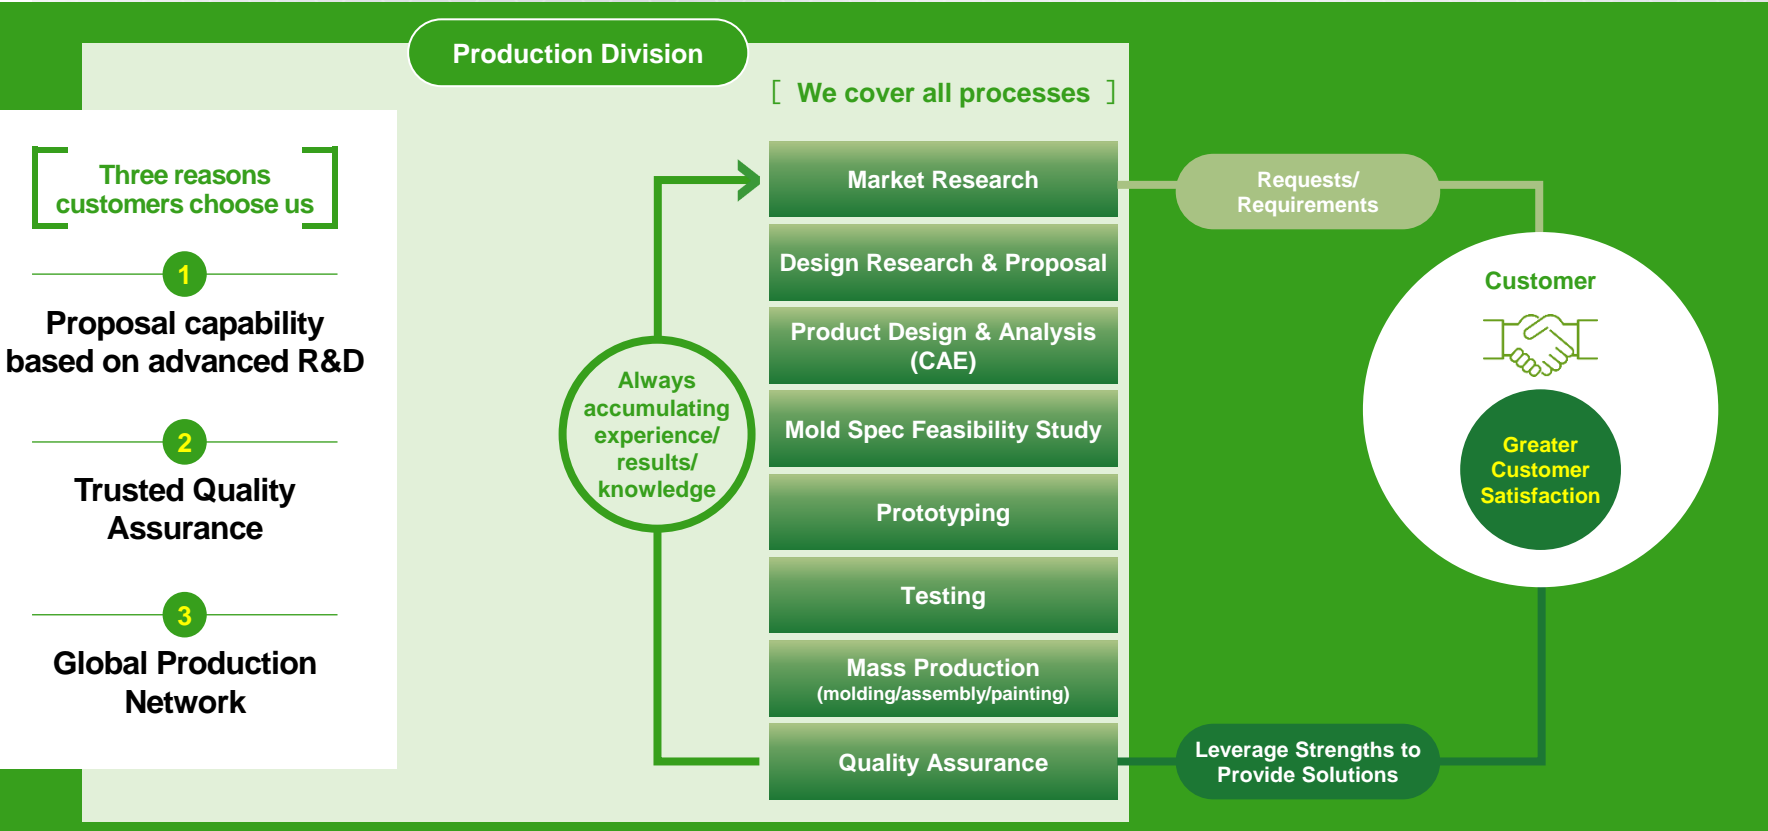

Four-Wheel Vehicle Interiors

An integrated System Covers from Planning to Mass-Production, Offering Solutions that Exceed Customer Expectations

We have built an in-house system that integrates all processes, from product planning and design to mold design and refining, prototyping, testing, and mass production. The progress toward final delivery and issues encountered are managed from a multi-faceted perspective. As well as generating greater customer satisfaction, the continuous PDCA cycle means we keep amassing new knowledge.

See here for details

As a Leading Partner for Mobility Manufacturers, We are Driving the Future of the Automobiles.

We identify and anticipate automobile industry trends and global market needs based on a well-understood user viewpoint, and proactively and repeatedly offer proposals to mobility makers. In this way, we become partners in making future mobility concepts a reality.

See here for details

Advanced R&D steps

[STEP 1] Market Research

- Attend exhibitions around the world and conduct local surveys
- Investigate trends and analyze superior technologies and ideas

[STEP 2] Identify & Anticipate Needs

- Sort user needs based on market surveys
- Predict mobility industry trends that are likely to become reality in the near future

[STEP 3] Concept Design

- Construct new concepts
- Perform detailed design and analysis to turn them into reality

[STEP 4] Mock-Up Proposal

- Create realistic Mock-up
- Conduct presentations for mobility makers

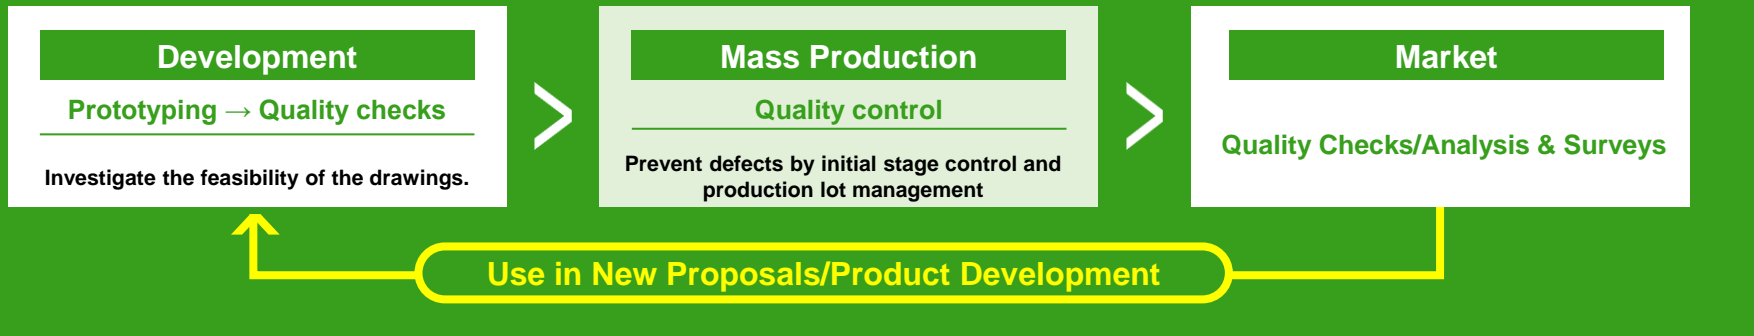

Utilize Knowledge in New Product Development to Pursue High Quality

We take knowledge gained from analysis of actual usage conditions and apply it in the design of new products, then subject the designs to in-house quality assessments and reliability testing. Umbrella organizations for Japan and North America perform quality control for each region and establish unified global quality levels.

See here for details

PDCA Cycle of Quality Assurance

Japanese umbrella organization backs up manufacturing bases in all regions

Moka Technical Research Center

Global Quality Assurance System

- R&D base (umbrella organization)
- Manufacturing bases

Share know-how

North American umbrella organization backs up manufacturing bases in all regions

Moriroku Technology North America Head Office & R&D

Testing Facilities

Electron microscope analysis

Environment vibration testing

Wind tunnel testing

Operating durability testing using robots

Our Production Sites are Strategically Located in Key Markets Around the Globe, offering mobility makers unparalleled manufacturing support

By establishing our presence in close proximity to mobility manufacturers worldwide, we help mitigate their production risks. Furthermore, we address the diverse needs of various regions by offering a wide range of decorative technologies, including integrated molding with in-mold films and various painting options for both large and small interior and exterior parts.

See here for details

Local supply in each region

Merits for Mobility Makers

- Increased local procurement reduces customs costs
- Protection against currency fluctuations
- Flexible response to needs (volume)
- Reduced lead times

Wide Lineup of Decorative Technologies

Provide New Products matched to market needs

[Production Division Decorative Technologies]

Molded-in decorative technologies	Multi Layer decorative method
Painting	Interior/exterior painting
Film decorative technology	In-mold decoration
	Insert molding
	Hot stamp method
	FILM laminating method
Surface material decorative technology	Recess vacuum forming
	MSM sheet method
	FILM laminating method (Sheet fitting)

Interior/exterior products painting

Sheet integration

First Mass-Production for Exterior Hot-stamp

The first mass production of Exterior parts(radiator grilles) using hot stamping decoration, which is an alternative to plating process, contributing to reduction of environmental impact.

Moriroku Group has developed a highly expandable foil and a proprietary construction method that effectively adheres to the foil. This unique method improves the design of automobile interior and exterior parts.

Proposing a New Interior Value that Combines Comfort and Design

In recent years, with the shift to electric vehicles and automated driving, mobility have shifted from "how they drive" to "how they spend their time," and more comfort is demanded in the cabin space. We added new value to the interior by dividing and diffusing the airflow and drawing the distributed air into the central area between the two airflows to create a soft and comfortable air-conditioned breeze. This air vent creates a large decorative surface on the front and achieves a high level of design by changing effects such as shading and gradation through lighting.

Reducing Petroleum-Derived Materials & Express the Value of Plant Derived Materials

Although environmentally friendly materials help protect the environment, they may not always be seen as valuable. Moriroku Group has developed expertise in determining the optimal blending ratio to maintain reliable onboard quality, which is a challenge for sustainable materials, and in designing molded product shapes that meet physical property requirements.

Excellent Harmony with Ambient Lighting Combines Design and Rationalization

※We are experienced in multi layer mass production.

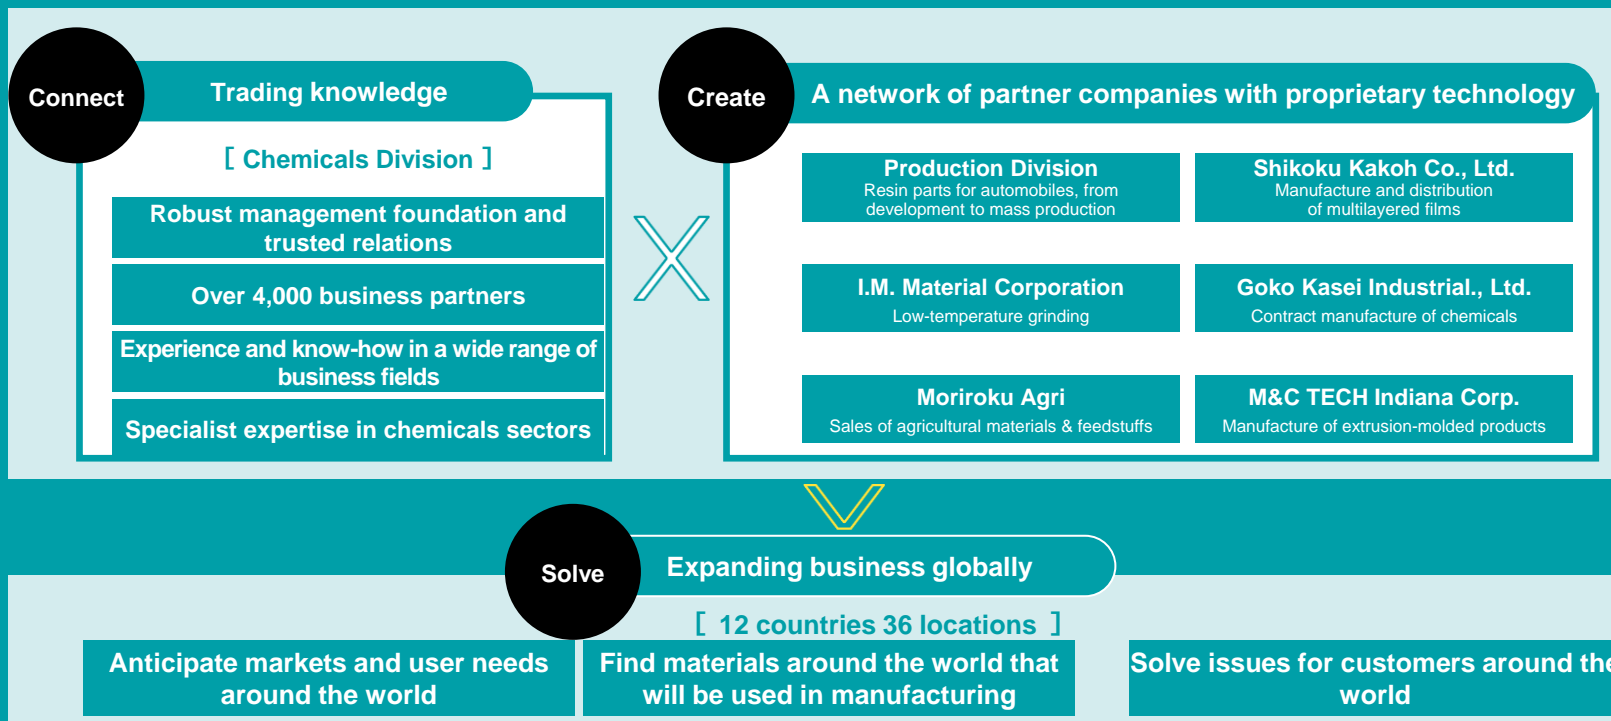

Moriroku Group has developed a technology to sandwich a printed film between the surface layer and the base material layer using a unique mold concept, which has increased the variation of multilayer decoration.

We challenged to develop a highly sophisticated technology for injection molding a light guide at the same time as the surface layer. This approach enabled the creation of a streamlined design that integrates decoration and lighting with a minimum number of mold structures and parts.

Connect, Create, Solve... Solutions Provider that Responds to Customer Needs

Our mission is to connect people to people and people to materials. We harness the combined technologies and insights of the Group to create new value with our chemical products. We are constantly employing our strengths to take on and resolve the challenges facing both our users and society.

We Conduct Six Business Fields, Providing Total Support for Customers in a Wide Range of Sectors

From food, lifestyle, and homes to electrics, electronics and cars, we meet needs in a wide range of sectors.

1 Fine Chemicals

Chemicals Division is globally expanding contract manufacturing based on manufacturing craftsmanship in the three major fields of fine chemicals, functional materials, and food and healthcare.

2 Coatings

We offer a wide range of products including basic chemicals and special function products to customers in the areas of coatings, such as paints and inks, industrial chemicals, and environment and energy.

3 Electronic Chemicals

We provide semiconductor materials, optical sheets, LED materials, and heat dissipation materials globally, with a focus on the electronic components market.

4 Lifestyle materials

In each sector from homebuilding and construction to lifestyle and environment, we globally procure and provide synthetic resin raw materials and resin treated parts that meet customer needs in Japan and overseas.

5 Mobility Materials

As a solutions provider, we work with customers from the development stage, helping to coordinate joint development using the latest materials and cutting-edge technology. We meet customer needs with global supply chains.

6 Resin-Treated Products

Our organization unites manufacturing subsidiaries and manufacturing affiliates that possess resin forming technology, and thereby creates new value in the "monozukuri" (manufacturing) sector.

Cooperating with Partner Companies in Manufacturing

We integrate the powerful information-gathering capacity of our global network with the advanced technological capabilities of our group companies to engineer and supply high-performance materials tailored to customer needs.

Manufacture and sales of
co-extrusion multilayer films

[Polyethylene Resin Formed in Corrugated Shape]

**Helps reduce resource
consumption while still being easy
to work with and highly durable.**

We use our resin molding and processing technology for other products besides multi-layer film. For over 40 years now, we have been the only Japanese manufacturer of APTON® corrugated plastic, made from polyethylene resin formed into a corrugated shape. The rigidity and cushioning properties of this corrugated plastic can be easily changed. This and the fact that it is made with recycled materials mean it is used in a wide range of industrial sectors for parts and packaging materials in which environmental impact reduction and reduced resource consumption are considerations.

APTON® used in containers for delicate seedlings

Example Case

Flexibly proposing products that meet customers' needs that changes with the time

High-gloss, high-transparency film suitable for the food industry that satisfies the best mechanical suitability and label adhesion properties, etc.

Clean and aseptic medical film produced under strict quality control to provide product safety and security

Shikoku Kakoh has been delivering films to our customers by making full use of our technology, knowledge, development capabilities, clean environment, and after-sales maintenance that we have continued to refine over the past 40 years, as well as our ability to respond to customer needs for food, medical, and semiconductor films and our delivery record. The performance and functions required by our customers vary widely, and we have developed a broad product lineup to meet the needs of each customer.

Example Case

Expanding business in the fine chemicals sector by making use of technology developed in dye synthesis and bromination reactions

We provide synthetic reactions, crystallization, solid-liquid separation, and purification services for chemical product intermediates. In addition to handling chlorination, bromination, functional materials containing fluorine, and agricultural chemical intermediates, we have been responding to demand in recent years and moving into the recycling and environmental businesses, and building results and experience in a wide range for sectors including industrial chemicals, automobiles, agricultural chemicals, and electronics materials.

Example Case

We use cold liquid nitrogen (-196°C) to create powders required for development materials from substances that are difficult to crush at normal temperatures

Under exacting quality control standards, we crush heat-sensitive materials at a chilly -196°C. These materials, which include elastomers and low-melting point resins, cannot be crushed at normal temperatures. The resulting powders can then be mixed uniformly with various other materials. Using university and pharmaceutical company networks, we prototype and develop machinery and devices for crushing and related work in the field of fine particles.

Sales of agricultural materials and feedstuffs

- Sales of Fertilizers, Agrichemicals
- Process and Sales of agricultural films and feedstuffs
- Sales of Agricultural products
- Sales of golf course materials (fertilizers, pesticides, colorants)

Plastic profile extrusion molding

- Profile extrusion molding
- Post-processing of extrusion molded products (welding, notch pressing, and tape fastening)

Example Case

Plant-derived bio-stimulant agent supporting sustainable agriculture

Naturally derived bio-stimulants are highly safe for plants, people, and the environment. They support healthy crop growth by alleviating various external stresses such as high temperatures and drought, and reducing the use of pesticides and chemical fertilizers.

Example Case

Using the collective capabilities of the group to build the future of mobility

CASE, MaaS, and the smart city concept represents once-in-a-century period of great change and the future of related mobility is expanding greatly beyond the categories of two & four wheeled vehicles. Chemicals Division will continue to anticipate the future of mobility by consolidating group's proprietary expertise in automotive materials and resin-treated products.

Creating new value through a strong overseas network with a focus on Asia, where high economic growth rates are expected

Following India, representative office in Vietnam commenced its operation in 2023. In the fields of "Fine Chemicals," "Automotive Materials," "Resin Treated Products," "Coatings," "Electrical and Electronics," and "Lifestyle Materials," Moriroku aim to develop promising markets in Asia, where further economic growth is expected, and expand our business by pursuing added value through our strong network with Israel, Europe, and the United States.

Taking multifaceted approach to create practical application, from material procurement to resin material development and mass production

Plastics, with their excellent durability and low manufacturing costs, are indispensable materials for automobiles, and various research and development efforts are underway to contribute to the global environment, including the development of recycled plastics and bioplastics. The Moriroku Group is also working on the practical application of plastics in automotive parts through a multifaceted approach, utilizing its strengths and technologies in areas ranging from material procurement to compounding, design, and analysis.

Main Financing Bank

MORIROKU CO., LTD.

| Sumitomo Mitsui Banking Corporation/The Awa Bank, Ltd./Resona Bank, Limited./MUFG Bank, Ltd./ Sumitomo Mitsui Trust Bank, Limited/Mizuho Bank, Ltd.

■Basic Chemical Products

- **Phenol and its derivative products**
Phenol, Bisphenol A, Nonylphenol ,etc.
- **Methanol and its derivative products**
Methanol, Formalin, Paraformaldehyde, etc.
- **Organic acid**
Phthalic anhydride, Isophthalic acid, Maleic anhydride, Succinic acid, Adipic acid, etc.
- **Acetic acid and its derivative products**
Acetic acid, Ethyl acetate, Butyl acetate, Vinyl acetate monomer, PVA, etc.
- **Acrylic acid, Methacrylic acid**
Acrylic acid, Acrylic esters, Methacrylic acid, Methacrylic esters, etc.
- **EO, PO and its derivative products**
EO, EG, PEG, Ethanolamine, PO, PG, PPG, etc.
- **Polyhydric alcohol and glycerin**
Pentaerythritol, Trimethylol propane, Neopentyl glycol, Glycerin, etc.
- **Organic solvent**
Toluene, Xylene, Cyclohexane, IPA, Acetone, MEK, MIBK, Cyclo hexanone, Ethylene glycol monoethyl ether acetate, PMAC, Glycol ethers, DMF, N-MP, DMSO, Dichloromethane, ODCB, etc.
- **Inorganic medicine**
Bromine, Sulfur, Sulfuric acid, Caustic soda, Magnesium sulfate, Magnesium chloride, Hydrogen peroxide, Activated carbon, Manganese and its compounds, Nickel and its compounds, Lithium compounds, Industrial gas, Aluminium oxide, etc.
- **Other Products**
TDI, MDI, Polyol, Acrylonitrile, Acrylamide, Liquid ammonia, Urea, Melamine, N-Methyltaurine

■Plastic Resins

- **General purpose resin**
PP, PE, EVA, PS, AS, ABS, AAS, AES, MBS, PMMA, MS, PVC, PVC compound, PET, etc.
- **High performance resin**
PA, PC, POM, PBT, PPE, GF-PET, PPS, LCP, EXOH, APO, Fluorine, PEN, COP, SPS, PEI, PES, PEEK, PI, etc.
- **Elastomer**
Olefin based, Styrene based, Nylon based, Polyester based, PVC based, Urethane based, etc.
- **Special resin**
Polylactic acid resin, Petroleum resin, High water-absorbing resin,etc.
- **Thermosetting resin**
Epoxy resin, Xylene resin, Phenolic resin, Unsaturated polyester resin, Polyurethane, etc.

■Plastic Additives

- **Plasticizer**
- **PVC stabilizer**
- **Antioxidant**
Phenolic antioxidant, Phosphite based antioxidant, etc.
- **Ultraviolet absorbent**
- **Infrared absorbent**
- **Antistatic agent**
Antistatic agent, Dielectric resin
- **Flame retardant**
Brominated based flame retardant, Phosphorus based flame retardant, Inorganic based flame retardant, etc.
- **Coloring agent for resin (Master batch)**
- **Foaming agent**
- **Lubricants**
Metallic soap based, Amide based, Bisamide based, etc.
- **Preservative and fungicide**
- **Filler agent**
Glass mat, Glass roving, Glass bead, Potassium titanate whisker, Calcium carbonate, Aluminum oxide, Talc, Silica, Silica gel, Kaolin, Wood Powder, etc.
- **Nucleating agent**

■ Synthetic Resin Products

- **Film/Sheet**
PVC, PP, PE, PS, PMMA, PET, PC, PAN, Multilayer, Dielectric, Antistatic, Foaming, etc.
- **Packaging materials and container materials**
General purpose bag, Barrier layered bag, Dielectric bag, Antistatic bag, Injection molding products, Vacuum molding products, Blow molding products, Other molding products, Flexible container, Extrusion molding products, etc.
- **Civil engineering work and construction materials**
Injection molding products, Extrusion molding products, Vacuum molding products, Blow molding products, Foamed products, etc.
- **Chemical fiber and inorganic fiber**
Non-woven fabric, Synthetic pulp, Monofilament, etc.
- **Discharged oil control materials and equipment**
TAFNEL Oil Blotter, Oil Absorber, Perlite, Oil fence, Oil absorbent, etc.
- **Auto parts**
Automotive electronic parts, Motorcycle parts, etc.

■ Fine Chemical

- **Drug medicine intermediates and Agrochemical intermediates**
OCPNA, Hydantoin, Benzoic acid, Bromine compound, etc.
- **Electronic materials intermediates**
- **Medicinal intermediate materials**
Maltose, Cellulose derivatives, etc.

■ Others

- **Fats and oily solutions**
Vegetable oils, Animal oils, Aliphatic acid, etc.
- **Surfactant**
Anionic surfactant, Nonionic surfactant, Cationic surfactant, etc.
- **Fine Ceramics**
Aluminum nitride, Silicon nitride, Boron nitride, Zirconium boride, Tungsten boride
- **Organo metallic compounds**
Organic aluminum compounds, Organic titanium compounds, Organic boron compounds, Organic phosphorus compounds, etc.

- **Painting raw materials and adhesives raw materials**

Paints, Inks, Alkyd resins, Amino resins, Vinyl resins, Acrylic resins, Epoxy resins, Polyurethane resins, Unsaturated polyester resins, Phenol resins, Synthetic resin emulsion, Water soluble resin, Chlorinated polyolefin, Fluoro resins, Petroleum resins, Ketone resin, Rosin modified maleic acid, Coumarone resin, Alkoxysilane, Powder painting resin, Ultraviolet curing resin, etc.

- **Pigment**

Titanium oxide, Fine powder titanium oxide, Cobalt oxide, Aluminum paste, Blanc fixe, Organic pigments, Nigrosine, Carbon black, Silica, Aluminum oxide, etc.

- **Synthetic dye**

Disperse dyes, VAT dyes, Acid dyes, Reactive dyes, Legal dyes, Water based pigment, etc.

- **Tackiness agent and adhesives**

Phenol based, Urea based, Melamine based, Vinyl acetate based, Rubber based, Silicone based, Acrylic based, Epoxy based, Hotmelt based, Urethane based, Cyanoacrylate based, tape, etc.

- **Biochemical products**

Cellulase, Amylase, Protease, etc.

- **Perfume and its raw materials**

- **Processed food ingredients, Food additive**

Processed starch, saccharides (reduced syrup, isomerized liquid sugar, etc.), seasonings (yeast extract, nucleic acid, etc.), functional ingredients (lactic acid bacteria, chitosan, etc.), soybean dietary fiber, acidifier/pH adjuster, thickening and stabilizing agent

- **Silicones**

Oil, Rubber, Resin, Silane, etc.

- **Synthetic rubber**

CM, Polymer, LX, Organic rubber chemicals, etc.

- **Mechanical, Metallic products**

Molding machine, Machine, Molds, Tools, Inspection tool, Metal parts, Electric tool parts, etc.

- **Others**

Drying agent, Polymer Flocculant, Hard coat materials
